Way too much work to setup matches. I need an assistant manager to setup a lot of this stuff.. A most entertaining DLC for New Vegas. The story is good an intriguing, destroying the warheads is fun and the new rendition of ED-E is very entertaining, mainly when he keeps playing his audio logs and you learn more of his past. I also enjoyed that at the end, you do not have to kill the main anti-hero. On the low side is the fact that it is fairly short. I got it as a part of the definitive edition and it is good fun!. Entertaining. Got about seven hours worth of playtime, playing through it several times for different branches.. Considering that this game is very early access, I have to admit its rather addictive, even though there's not a lot to do. So far, I am enjoying the map, finding loot and evading the creatures of the night. The Developer sounds like he's a cool guy, so I am sure he will continue adding and refining. I also find its a fresh take on the usual survival games (other than zombies).

7V10

loses 1 mark for the lack of gamma adjustment
loses 1 mark for lack of enemy types
loses 1 mark for restricted crafting

That said when all these are rectified it will be a very nice game indeed!. My Playthrough - https://www.youtube.com/watch?v=T_6wRq78uOk

Uhh kind of a stupid game. The graphics weren't that bad though, the writing wasn't the easiest to read as it made no sense but you get the gist of what it meant. there were a couple of parts of this game that scared me *jumpscare like* overall didn't really understand it. It crashed for me twice when i tried to go into the basement.. 3rd time lucky it loaded properly. Couple of times the game flickered too and i don't think that was deliberate..... But i would recommend if you want a silly game to play just for a laugh and if you're willing to spend £1.59 then why not.

. the game has potential but I have to click to move my character? that's a instant put down for me. I would rather be able to use my arrow keys or my controller..not be forced to make my character move place to place by clicking..I do not recommend anyone to play this game..unless you like clicking to make yourself move then go right ahead..I personally find that annoying and a fun killer

The game is fun and the maps look awesome. It just does not have enough features the make it stand out. I do recommend it but make sure you know what your buying.. This was a neat little Gradius-clone, luckily I had beaten Gradius V not too long ago, so I still had a little "skill" left.. a man puts his mind in his work,his feeling his sol and his love...
the game is a tottaly 100% money driven game,either there is no love for the genre,
or there is no love for art,or there is no love for the programming,
what is a man without a hart?
then why would you draw such a thing?

if it one thing that drawing teaches you it is that what you love to draw comes out much stronger...
and that where you lack becomes ugly...and just a blur of blended paint.
if one thing it is that programming teaches it is that that little peace of information can save hours...of extra code.
as for the genre expand explore build ...there is little there.

what is a managing game in micro managment...time saver? or game waster?
as an [artist.in any kind of \(free\) art you have to able to take complaints.](#)
[it is not a code you write is a current of switches finly tuned to do what you want.](#)
[it is a poem that charis not a bold word code.](#)
[a variable that always stand still is not variable at all.](#)
[if every turn of time is only there to make union income.and no turn is there for the game except expansion of enterprise.](#)
[then that is all you are focusd on that is in your 3rd eye....](#)
[every building on a planet needs a solid foundation in order to expand to space and beyond...](#)
[workers go from planet to planet in little space ships....they dont stand variable still on the planets surface.](#)
[there is a condition...that is i first need to look.then i need to feel.then i need love.](#)
[love takes time...](#)
[put little character on a giant rocky planet....there does not have to be a story.](#)
[look at what its missing...a house a tree an apple some grass air fire...and what not.](#)
[for you character to be happy it needs all these conditions.or he could be there.](#)
[why would a god put some one inside a box and write for him what to do...rather he provides it whit all he needs.](#)
[let the character decide the story.. this game is very poor looking. there are many spelling errors and it wouldn't even load after an hour. Yes, I've only played this game for 20 minutes but that's all I need to know that this is a poorly coded game that has been pushed out unfinished to cash in on Wimbledon.](#)

[First impressions last as they say and in this case the game loaded at a resolution 1360x768. the maximum one selectable from a choice of three that included 1280x720 and 1280x800! That was not a great start! This is on a GTX 1080 Ti graphics card and, no, this is not a port of a WiiU game! The main menu has incomplete button prompts too. A for Confirm and B for...? At a guess, it's Quit but the game doesn't bother to tell you that; it just shows a button letter with no text. Yes, the quality control is fantastic for this game!](#)

[Visually the game is very dated and barely improved over the Top Spin games on Xbox 360 and PS3. Presentation is also lacking with blurry fonts and a depressingly lacklustre character customisation option which does the bare minimum to just about qualify as being customisable. You get a choice of pre-set faces but no options to tweak facial details, facial hair, hair styles, kit, etc. you know like other tennis games have been doing for years.](#)

[Gameplay is fine, pretty much like Top Spin, but everything else is so disappointing and/or buggy that it's hard to feel anything else but bitter disappointment. This is a budget game being sold at a near full-price of, at the time of writing this, £32.99 \(20% off\). It doesn't even ship with online gameplay - that's coming soon apparently. I would not recommend buying this game until it is has been patched with the online mode included and other bugs fixed.. I bought this because it seemed really bad and a friend and I wanted to have a good laugh.](#)

[The character art is okay, but the backgrounds are just pictures with filters.](#)

[Each route takes about 10 minutes to complete. I don't honestly think this product should be sold. It should be a free game for what is offered. There are so many better VNs out there for free.](#)

[But again, if you want a good laugh, go for it.](#)

There are parts where you can't even read the text because it skips automatically for you. There are times when the text wrapping is bad and cuts off a word. Sometimes, the little rainbow at the bottom right corner of the text box blocks a word. The translation is...bad and awkward.
